

Model **Airone Max**

Tenso-static Modular Structures for Restaurants, Car Parks, Industrial Warehouse, Military Grounds, Airports & Harbours, Sports Areas, Receptive Tourist Structure.....

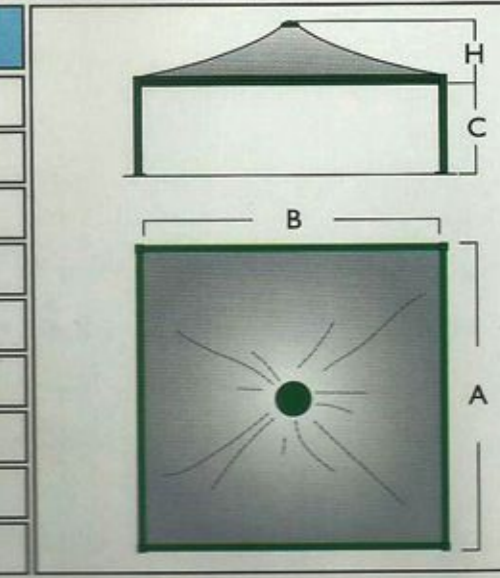

AIRONE MAX IS A LINE OF Tenso-Static Molular Structures having extreme adaptability to cover areas with basic modules starting from 4 Meters x 4 Meters upto 15 Meters x 15 Meters. The concept of junction Fittings facilitates quick and easy installation at site. Rain water is collected in the Perimetrical Beams and channeled to the ground thru the Vertical Pillars. The Galvanized structure gives a long life. Modules can be conveniently added on all the side and side walls can be added for creating privacy.

Model Airone Max **Heavy** with galvanized steel frame of power coated & fire retardant PVC-covering.

Side measure	m ²	A	B	C	H
m 7.00	49	7.00	6.65	2.50	2.10
